EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the specification:

On page 1, line 2, delete "09/071,634" and substitute therefore --10/071,634--; and after "2002," insert --now abandoned--.

In the claims:

In claim 27, line 1, delete "16" and insert therefore --18--.

The above changes were needed to correct obvious typographical errors, where the serial number of the parent case was the wrong series number, and such is clearly suppose to be a 10 series application number which matches the same filing date set forth in the application. With respect to the obvious typing error in claim 27, such was a method claim that was dependent from an article claim which was clearly a typographical error where claim 18 is the independent method claim, and appears to be the correct dependency, however, as set forth above applicant can submit a change to the proper dependency if claim 18 was not the correct parent claim.

The following is an examiner's statement of reasons for allowance: the prior art of record fails to disclose the recited fuel hose comprising a first tubular structure made from a specific blend of about 5 to 95 weight percent of a first fluoropolymer having a fluorine content of about 68 to 75%, said first fluoropolymer comprising a copolymer or terpolymer formed of two or more monomers selected from the group consisting of hexafluoropropylene, vinylidene fluoride and tetrafluoroethylene, and about 95 to 5 weight percent of a second fluoropolymer having a fluorine content of about 73 to 78%, said second fluoropolymer comprising a terpolymer of hexafluoropropylene, vinylidene fluoride and tetrafluoroethylene, wherein said first fluoropolymer exhibits elastomeric characteristics and said second fluoropolymer exhibits thermoplastic characteristics; a second tubular structure formed around said first inner tubular structure, said second tubular structure comprising a fluorothermoplastic terpolymer of hexafluoropropylene, tetrafluoroethylene, and vinylidene fluoride; and a protective cover, wherein one of said first tubular structure and said second tubular structure forms an inner barrier layer and the other of said first tubular structure and said second tubular structure forms a second layer around said inner barrier layer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
